

Connecting a Windows PC to the new PRCC Wifi

1. Click the network icon in the system tray to display a list of available networks.

2. Click on PRCC

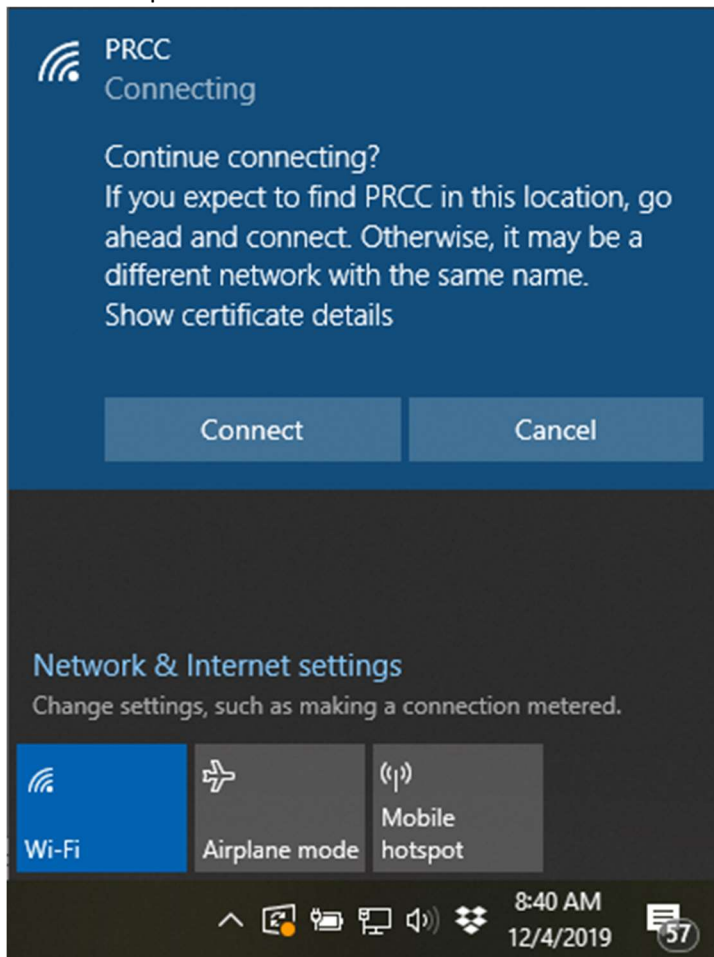

3. Select Connect

The image shows a Windows Network & Internet settings window. At the top, it displays 'PRCC Secured' with a Wi-Fi icon. Below this, it prompts the user to 'Enter your user name and password'. There is an unchecked checkbox for 'Use my Windows user account'. Below the checkbox are two text input fields labeled 'User name' and 'Password'. A link for 'Connect using a certificate' is visible. At the bottom of this section are 'OK' and 'Cancel' buttons. The bottom half of the window is titled 'Network & Internet settings' with the subtitle 'Change settings, such as making a connection metered.' It features three toggle switches: 'Wi-Fi' (which is turned on), 'Airplane mode' (turned off), and 'Mobile hotspot' (turned off). The Windows taskbar is visible at the very bottom, showing the time as 8:38 AM on 12/4/2019 and a notification icon with the number 57.

4. If using a PRCC computer, you may check “Use my Windows user account”. If using a personal device or generic Windows login, enter your RiverGuide credentials.
5. Click OK.

- When Prompted click Connect

- You are now connected to the PRCC network.
